

FWLD 450 Bachelor Degree Internship Program Student Learning Outcomes & Objectives and Activities

Internship Student Learning Outcomes FWLD 450:

- Students will learn additional hands-on skills during the internship that will build upon technical and practical skills learned in the classroom, laboratory and field.
- Students will understand the professional expectations that their supervisor has of them with regard to performing work responsibilities.
- Students will be able to explain how their particular job function relates to the overall goals of the cooperating fish and wildlife agency.
- Students will demonstrate the ability to follow instructions and collect information in an organized and timely manner.
- Students will use the knowledge obtained on their internship to test and clarify their career interests and aptitudes in fisheries and wildlife.

Internship Objectives and Activities Instructions:

1. Please review the outcomes above with the Faculty Supervisor.
2. **In a new document**, list objectives of your internship and the specific activities to be completed. Indicate approximate amount of time to be devoted to each activity. Be as specific as possible. (The Faculty Supervisor will provide guidance in initial preparation of this section with input from the Site Supervisor.)
3. Once completed and approved by your faculty supervisor, please attach **this form AND your typed document** (Word or PDF document required) to the Internship Learning Agreement (ILA). *Please do not attach and submit this document until everyone agrees to the objectives and activities you've provided.*

For help completing this task or with the internship registration process please email internships@cobleskill.edu
